

DEPARTMENT OF AGRICULTURE AND TECHNICAL
INSTRUCTION FOR IRELAND.

AGRICULTURAL STATISTICS
OF
IRELAND,

WITH DETAILED REPORT FOR THE YEAR
1903.

Presented to both Houses of Parliament by Command of His Majesty.

DUBLIN :
PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY ALEXANDER THOM & CO. (LIMITED).

And to be purchased, either directly or through any Bookseller, from
E. FONSEBY, 118, GRAYSON-STREET, DUBLIN; or
EYRE & SPOTTISWOODE, EAST HARDING-STREET, FLEET-STREET, E.C., and
32, ABINGDON-STREET, WESTMINSTER, S.W.; or
OLIVER & BOYD, EDINBURGH.

1904.

[Cd. 3196.] Price, 1s.

To

HIS EXCELLENCY, WILLIAM HUMBLE, EARL OF DUDLEY,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,

I am directed by the Vice-President to submit to Your Excellency the Tables and Detailed Report on the Agricultural Statistics of Ireland for the year 1903.

I have the honour to be,

Your Excellency's faithful Servant,

T. P. GILL,

Secretary.

DEPARTMENT OF AGRICULTURE

AND TECHNICAL INSTRUCTION FOR IRELAND,

UPPER MERRION STREET,

DUBLIN, 20th July, 1904.

DUBLIN CASTLE,

22nd July, 1904.

SIR,

I have to acknowledge the receipt of your letter of the 20th instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Tables and Detailed Report on the Agricultural Statistics of Ireland for the Year 1903.

I am, Sir,

Your obedient Servant,

J. B. DOUGHERTY.

THE SECRETARY,

DEPARTMENT OF AGRICULTURE AND

TECHNICAL INSTRUCTION,

UPPER MERRION STREET.

AGRICULTURAL STATISTICS, IRELAND. 1903.

AGRICULTURAL STATISTICS, IRELAND, 1903.

REPORT

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

Pending the appointment of a successor to the lamented Dr. Coyne I have the honour to submit the detailed Annual Report on the Agricultural Statistics of Ireland for the year 1903.

The Summary Tables (pp. 2-21) have been included as usual in order to bring out clearly the chief features of the Agricultural Statistics contained in the Detailed Tables (pp. 22-165). It is hoped that the detailed Table of Contents (pp. xxvii-xxxii) will enable the large number of Tables in the volume to be consulted with ease.

The total area of Ireland—according to the Census of 1901—was 20,345,328 statute acres. The inclusion

Division of Land. of 5,897 acres of reclaimed slob in the Co. Wexford brings the total area to 20,350,725 statute acres. This total includes 117,135 acres under water, but excludes close on half-a-million acres (487,418 is the exact number) under the larger rivers, lakes, and tideways. The following statement* shows the distribution of the areas in 1902 and 1903:—

—	1902.	1903.	Increase or Decrease between 1902 and 1903.	
			Increase.	Decrease.
Under Crops, including "Olover, Sainfoin, and Grasses for Hay," ...	3,030,171	3,038,073	7,902	—
Under Grass, including temporary pasture, and Hay mown on permanent pasture, ...	12,200,430	12,194,827	—	5,603
Under Small Fruit and Fallow, ...	9,544	9,722	178	—
Under Woods and Plantations ...	303,023	304,023	1,000	—
Under Bog, Waste, Barren Mountain, Water, and Marsh, ...	4,807,567	4,804,223	—	3,344
Total, ...	20,350,725	20,350,725	—	—

* This statement is not, for reasons explained in the text, comparable with the Table given on page 9 of the "Agricultural Statistics of Ireland for the year 1899," or with similar Tables in Reports previous to that year. See, however, Table A, page 2 of this Report.

The classification adopted in this statement differs from that used in the Reports of this series for the years previous to 1900. "Hay mown on permanent pasture" and "temporary grasses" when grazed are put in the category of "Grass" (though technically, of course, as being under rotation, the latter is a "crop"). The idea is to divide off as far as possible arable land from pasture; to distinguish, in other words, land under the plough from land directly given over to stock-raising, or, as it may be called, pastoral land. The division as here given is not quite perfect for the reason just alluded to, that "temporary pastures" would strictly come under the term arable land, but in view of the fact that such lands are often not broken up in many parts of Ireland for three, five, or even ten years, during which time a large percentage of them are grazed, the object of the classification adopted is apparent. The importance of adopting such a classification in order to bring out clearly and strongly the effect produced on the rural economy of Ireland by the gradual and continuing transfer of land from tillage to pasture will be readily understood in connection with the consideration of the question as to whether the return of the land to tillage would not "increase the national wealth; supply work for the labourers and tradesmen; and check emigration."* The amount of land under permanent pasture during a series of years is shown; however, in the following table:—

YEAR.	Clover, Sainfoin and Grasses under Rotation.		Permanent Pasture or Grass not broken up in Rotation.	
	For Hay.	Not for Hay.	For Hay.	Not for Hay.
	Acres.	Acres.	Acres.	Acres.
1886,	635,580	680,768	1,638,890	2,630,682
1891,	655,071	694,915	1,617,303	2,608,612
1897,	637,123	614,361	1,638,014	2,867,219
1898,	652,040	601,016	1,622,420	2,899,103
1899,	624,163	635,353	1,624,714	2,938,660
1900,	607,380	611,357	1,658,335	2,962,035
1901,	617,350	610,410	1,593,202	2,960,798
1902,	603,463	621,463	1,594,906	2,910,961
1903,	627,229	608,776	1,605,206	2,935,916

The figures in the statement on page v would appear to indicate that 7,901 acres of land were added to the area under crops in 1903 as compared with the preceding year, and that the area under grass decreased by 5,793 acres; but it will be seen from an inspection of the figures in the table on this page that while the extent under grass grown for pasture (including "temporary grasses") is less by 37,703 acres than in 1902, the area devoted to grass grown for hay was increased by 55,701 acres; moreover,

* See the Department's Leaflet, No. 34: "The Revival of Tillage in Ireland."

the decrease of 3,315 acres tabulated on page v under the heading of "Bog, Waste, Barren Mountain," is, in part, probably due to a not unnatural divergence of opinion amongst the Enumerators in the different years as to what kind of land exactly should be described as "Barren Mountain." A tract of mountain-side which carried a few score sheep in one year may not happen to be grazed at the time of enumeration in a succeeding season, with the result that it is entered on the statistical forms in a different column on each occasion. Such indeterminate grazing areas are, doubtless, a source of error in comparative classification; but every effort is made by carefully-worded instructions, by queries to the Enumerators for purposes of verification, and in other ways, to minimise the possibilities of serious error. Moreover, errors of classification of the kind referred to would probably tend to correct each other when a long series of years is taken into consideration.

The statistics of the cropped area of Ireland in 1903, compared with those of the previous year, show that while there was a slight increase in the area devoted to arable uses with a smaller decrease in the land used for pastoral purposes, a net shrinkage of 223 acres took place in cereal crops, accompanied by a net shrinkage of 10,610 acres in green crops. The area under flax decreased by 5,057 acres. Meadow and clover occupied 55,701 acres more, and grass (pasture) 37,703 acres less than in 1902.

Crop Areas.

On an examination of the details of the decline in the area of the cropped lands of Ireland, during the period from 1855 to 1903, it is found that the greatest and most serious decline occurs in the cereal crops. From the strictly economic point of view, the yearly increasing scarcity of agricultural labour; the fact that the prices of corn crops have fallen during a period of over thirty years to a much greater extent than the prices of meat-stuffs or dairy produce; and the splendid natural richness of the pastures of Ireland, point to an explanation of the decay of grain farming in this country. Since 1855 our wheat area has shrunk from 445,775 acres to 37,596 acres in 1903; our oat crop (though still pre-eminently Ireland's great cereal, and though showing a slight increase for 1903) has decreased by nearly 50 per cent.; while our barley (an industrial crop for which there is always a ready market at home) has declined from 226,629 acres in 1855 to 158,712 acres in 1903. That the decline of the root crops (including potatoes) has, though serious, not been so marked will appear from this statement:—

Acreeage under Cereals, Roots, and Meadow in 1855 and 1903.

—	1855, Statute Acres.	1903, Statute Acres.	Percentage.	
			Increase.	Decrease.
Cereals, ...	2,532,564	1,306,945	—	53.9
Root Crops, ...	1,444,896	1,009,783	—	31.0
Meadow, ..	1,314,807	2,221,165	69.2	—

The details of the changes for the separate crops are clearly brought out in the subjoined Table:—

TABLE showing the Area under the principal Cereal and Root Crops, and Meadow, in each of the years 1855, 1860, 1870, 1880, 1890, 1900, and 1903.

YEAR.	Oats.	Meadow.	Wheat.	Barley.	Flax.	Potatoes.	Turnips.	Mangel Wurzel and Beet Root.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1855,	2,113,853	1,314,837	443,775	259,629	97,075	962,301	355,533	32,667	5,571,925
1860,	1,993,304	1,304,638	485,415	181,099	128,535	1,172,079	312,540	32,124	5,399,674

	1,063,220	900,358	408,179	67,917	62,390	361,908	79,465	61,507	1,033,254
	Rate per cent.	45.2	69.2	21.6	30.0	54.0	36.8	21.6	23.1

Comparing the year 1903 with 1902 in regard to the area under cereals and green crops, we find the following results:—

CEREALS—1903 compared with 1902.		GREEN CROPS—1903 compared with 1902.	
Wheat,	-6,663	Potatoes,	-8,911
Barley,	-9,976	Turnips,	-908
Oats,	+13,834	Vetches and Raps,	-424
Bore and Rye,	+402	Mangel Wurzel and Beet, ...	-1,070
Beans and Pease,	-295	Cabbage,	+2,312
		"Other Green Crops," ...	-1459
Net decrease of Cereals in 1903, 233 Acres.		Net decrease of Green Crops in 1903 10,510 Acres.	

The most noticeable features in these tables are the decreases in the areas under the cereal crops—wheat, barley, and oats (the last-named fell continuously from 1,254,837 acres in 1894 to 1,082,144 acres in 1902, but showed a small increase to 1,097,538 acres in 1903); and the quite remarkable shrinkage in the area under potatoes. The present year is the fifteenth in succession in which the acreage under potatoes has decreased.

In 1888 it stood at 804,566; in 1903 it is 620,393—a decline of 184,173 acres in fifteen years.

The serious and continuing decline in the area under turnips is also worthy of attention. Turnips and swedes have apparently been found a precarious and, therefore, an expensive crop both in Ireland and Great Britain, if we may judge from the shrinkage in the areas under this class of roots. Mangel wurzel is less liable to disease, and, notwithstanding a small decline of the area under the crop last year, more and more attention is being devoted to its cultivation in this country.

In regard to the chief cereals, the cultivation of both wheat and barley is still considerably localized; while the culture of oats, on the other hand, is, like that of potatoes, spread over almost every district of the country.

WHEAT.

While Ireland produces over one-fourth of the oats grown in the United Kingdom, her proportion of barley is less than one-eleventh, and of wheat only about a forty-third part. The counties Down, Cork, Dublin, Wexford, Galway, Limerick, Tipperary, Kilkenny, and Tyrone are, in the order given, the greatest wheat-growing districts. Taking provinces as the unit, we find that, out of a total area under wheat in 1903 of 37,596 acres, Ulster, contributed 11,265 acres (Down alone having 5,801 acres, or 51 per cent. of the total for the Province); Leinster, 11,022 acres; Munster, 10,666 acres; and Connaught, 4,643 acres.

BARLEY.

The culture of barley on anything like a large scale is confined to eight counties. The provinces of Leinster had under barley 71 per cent. of the total area under that crop in 1903, while Munster had 24 per cent. Ulster and Connaught had, respectively, 3 and 2 per cent. of the total barley area. Appended is a list of the counties in which an area of 1,000 acres or upwards was under barley last year:—Wexford, 31,521; Queen's County, 19,016; Tipperary, 18,631; Kilkenny, 17,277; Cork, 16,304; King's County, 14,781; Louth, 13,366; Kildare, 9,687; Carlow, 4,538; Galway, 2,330; Down, 2,232; Waterford, 1,509; Kerry, 1,433; and Dublin, 1,353.

The following statement shows the estimated total production of barley in Ireland for several years back :—

Year.	No. of Statute Acres under Barley.	Yield, (Owls.)	Yield per Statute Acre. (Owls.)
Average, 1888-97,	174,000	2,935,000	169
1892,	158,000	2,080,000	189
1893,	160,000	3,040,000	170
1900,	174,000	3,779,000	189
1901,	165,000	3,945,000	180
1902,	165,000	3,548,000	211
1903,	160,000	2,004,000	164

The area under barley last year was 9,000 acres less than that for 1902, 3,000 acres less than that for 1901, but 15,000 acres less than that for 1900, which was the highest acreage since 1892 when the area under the crop was over 175,000 acres.

OATS.

The area under oats which had decreased annually since 1894, showed a slight recovery—15,394 acres—in 1903 when compared with 1902, but was still 157,299 acres below the extent under the crop in 1894. It is worthy of note that of the acreage under oats last year nearly 50 per cent. (47·8) is recorded for Ulster—the distribution amongst the counties of that Province being, in order of extent, as follows—Down, 94,972 acres; Tyrone, 87,383 acres; Donegal, 81,137 acres; Londonderry, 67,763 acres; Antrim, 62,235 acres; Armagh, 45,428 acres; Monaghan, 39,954 acres; Cavan, 29,692 acres; and Fermanagh, 15,625 acres. The percentages for the other Provinces were, Leinster, 22·2; Munster, 19·5; and Connaught, 10·5.

POTATOES.

The potato crop in Ireland is not of so paramount an importance as it was three or four decades ago, largely, of course, owing to the great emigration from the class who were the chief consumers of potatoes, but also, in some degree, to the introduction of a more varied dietary among the people. The potato still, however, forms the staple food of a large proportion of the poorer population of the South and West and North-west. As already stated, the acreage under potatoes in Ireland in 1903 was 620,893 as compared with 629,304 in the year 1902, showing a decrease of 8,911 acres. It is noticeable that there was in 1903 a decrease of 9,594 acres in the area under potatoes in Great Britain. Of the acreage under potatoes in Ireland in 1903, 63·7 per cent. consisted of "Champions," leaving only 36·3 per cent. for all other varieties. From the year 1891, however, the proportion under "Champions" showed a gradual decline from 79·7 per cent. in that year to 66·1 per cent. in 1900, in 1901 the pro-

portion showed a slight recovery to 66·4 per cent., but in 1902 it fell to 65·5 per cent., and in 1903 to 63·7 per cent., the lowest since the year 1882. The very considerable yearly fluctuations in the produce per acre of the potato crop is shown in the following tabular statement with which the accompanying diagram may be compared:—

Years.	Tons.	Years.	Tons.	Years.	Tons.
1884,	38	1891,	49	1898,	41
1885,	40	1892,	54	1899,	42
1886,	34	1893,	47	1900,	28
1887,	45	1894,	26	1901,	53
1888,	31	1895,	49	1902,	43
1889,	36	1896,	32	1903,	26
1890,	28	1897,	22	Mean,	37

FLAX.

The industrial fibre crop, flax, shows in 1903 as compared with 1902, a decrease of 5,057 acres, or 10·2 per cent., following a decrease of 5,700 acres, or 10·3 per cent., in 1902 as compared with 1901. As usual, the cultivation of flax was almost entirely confined to Ulster, the area covered by the crop being 44,354 acres; in Leinster the extent was only 76 acres; in Munster, 54 acres; and in Connaught, 201 acres, to which amount the County Mayo contributed 176 acres.

As a general basis for calculating the average annual value of Irish crops, the following table, prepared by Sir Robert Giffen for the Financial Relations Commission, affords a careful estimate—

QUANTITY AND VALUE OF IRISH CROPS (1889-1893).

CROP.	Average Annual Produce.	Average Price Assumed.	Annual Value of Crops.
	Thousand Cwt.	Per Cwt.	Thousand £.
Wheat,	1,366	7 0	443
Oats,	18,346	6 6	6,992
Barley,	3,061	7 0	1,065
Bere and Rye,	184	6 6	69
Beans and Pease,	87	6 6	29
Flax,	314	55 0	894
	Thousand Tons.	Per Ton.	
Potatoes,	2,669	60 0	8,007
Turnips,	4,267	12 0	2,572
Mangold,	729	16 0	642
Hay,	4,566	28 0	13,110
Total Estimated Value of the Crops,			32,756

For the purpose of comparison with the figures in the above table the Quantity and Value of the same Irish Crops in 1903 are shown on next page. The prices used by Sir Robert Giffen for "Bere and Rye," "Beans and Pease," "Turnips," and "Mangold,"

have been adopted as the prices in 1903. In the case of the other crops the prices are those published in the Department's Annual "Return of Prices" for the year 1903 :—

QUANTITY AND VALUE OF IRISH CROPS IN 1903.

CROP.	Estimated Produce in 1903.	Average Price	Estimated Value of Crops.
	Thousand Cwt.	Per Cwt.	Thousand £.
Wheat,	630	£ 5 3½	198
Oats,	15,805	5 4½	4,516
Barley,	2,604	7 0	941
Bere and Rye,	135	5 6	44
Beans and Pease,	59	6 0	16
Flax,	173	49 2	425
	Thousand Tons.	Per Ton.	
Potatoes,	2,363	70 0	8,270
Turnips,	3,686	12 0	2,186
Mangold,	1,024	15 0	768
Hay,	5,202	55 5	11,414
Total estimated Value of the Crops,			31,720

In the low yield of the chief crops in 1903, the Irish farmers had sufficient proof of the unfortunate climatic conditions which prevailed during the year. The lateness of the spring, the small amount of bright sunshine, and the excessive rainfall combined to produce a harvest much below that for 1902, and also below, but not to so great an extent, the average yield for the decade 1893-1902. The following tabular statement brings out this clearly:—

YEARS.	Estimated Average Produce Per Statute Acre.									
	Wheat.	Oats.	Barley.	Bere.	Rye.	Potatoes.	Turnips.	Mangel Wurzel and Beet Root.	Cab-lage.	Flax.
	Cwts. 112 lbs.	Cwts. 112 lbs.	Cwts. 112 lbs.	Cwts. 112 lbs.	Cwts. 112 lbs.	Tons.	Tons.	Tons.	Tons.	Stones. 14 lbs.
1902,	104	173	211	144	146	43	171	129	105	262
Average 1893-1902,	173	156	175	135	129	39	153	167	101	305
1903,	103	153	194	128	134	38	125	125	97	309

Comparing the produce of the cereal crops in 1903 with the produce in 1902, we find a decrease in wheat of 228,047 cwts., or 26·6 per cent.; in oats of 1,929,564 cwts., or 10·3 per cent.; in barley, of 941,459 cwts., or 26·6 per cent.; in beans, of 9,379 cwts., or 17·1 per cent.; in pease of 896 cwts., or 16·2 per cent., with a decrease in bere of 38 cwts., or 3·0 per cent.; in rye, of 322 cwts.,

or 0·2 per cent. In green crops, potatoes show a decrease of 362,495 tons, or 13·3 per cent.; turnips, a decrease of 1,351,029 tons, or 27·3 per cent.; mangel wurzel and beet-root, a decrease of 488,080 tons, or 29·9 per cent.; and cabbage, a decrease of 12,507 tons, or 2·8 per cent. Flax shows a decrease of 418,255 stones of 14 lbs., or 28·3 per cent. (following a decrease of 325,285 stones, or 15·3 per cent., in 1902; an increase of 495,148 stones, or 30·4 per cent. in 1901; an increase of 483,620 stones, or 42·2 per cent., in 1900; an increase of 69,404 stones, or 6·5 per cent., in 1899; a decrease of 87,707 stones, or 7·5 per cent., in 1898 as compared with 1897; a decrease of 483,213 stones, or 29·3 per cent., in 1897 as compared with 1896; a decrease of 304,173 stones, or 15·6 per cent., in 1896 as compared with 1895; a decrease of 1,490,281 stones, or 43·3 per cent., in 1895 as compared with 1894; and an increase of 980,112 stones, or 39·8 per cent., in 1894 as compared with 1893); hay from clover, sainfoin, and grasses under rotation, a decrease of 36,601 tons, or 2·6 per cent.; and hay from permanent pasture or grass not broken up in rotation, an increase of 62,134 tons, or 1·6 per cent.; the entire hay crop showing a net increase of 25,533 tons, or 0·5 per cent.

The yield per acre of cereal crops in 1903, compared with that of 1902, shows a decrease in wheat from 19·4 cwts. to 16·8 cwts.; in oats, from 17·3 cwts. to 15·3 cwts.; in barley, from 21·1 cwts. to 16·4 cwts.; in rye, from 14·0 cwts. to 13·4 cwts.; in beans, from 23·7 cwts. to 21·9 cwts. Bere shows an increase from 14·4 cwts. to 15·8 cwts. The yield in pease per acre is 15·9 in both years. In other crops—potatoes show a decrease from 4·3 tons to 3·8 tons; turnips, a decrease from 17·1 tons to 12·5 tons; mangel wurzel, from 19·0 tons to 13·5 tons; and cabbage, a decrease from 10·5 tons to 9·7 tons. Beet-root shows an increase from 13·6 tons to 14·8 tons. Hay from clover, sainfoin, and grasses under rotation shows a decrease from 2·3 tons to 2·2 tons; while the yield of hay from permanent pasture or grass not broken up in rotation is the same (2·4 tons) in both years. The yield per acre of flax was 30·9 in 1903, against 36·2 in 1902, 38·3 stones in 1901, 34·3 stones in 1900, 32·7 stones in 1899, 31·2 stones in 1898, 25·6 stones in 1897, 22·8 stones in 1896, and 20·5 stones in 1895, when the yield was lower than in any year since 1871, with the exception of 1877.

Table K., on pp. 9–11, gives, amongst other particulars, the estimated average yield per acre of the principal crops in 1903 for England, Wales, Scotland, and Ireland, and shows that, despite the poor weather conditions, the yield per acre for wheat, barley and oats in Ireland was higher than for any of the three other countries with the single exception of wheat in Scotland; these estimates redound to the credit of our Irish farmers, as well as emphasize the natural richness of certain districts of Ireland for grain raising, and also the differences of soil and climatic conditions between this country and Great Britain. In considering their significance, however, regard must be had to

the comparatively small areas under wheat and barley. It will be noticed that Scotch farmers with a slightly larger area under wheat succeeded in raising on an average nearly 5 bushels per acre more than was raised in Ireland; while in the case of barley, of which cereal 55,000 more acres were grown last year in Scotland than in Ireland, the estimated yield per acre for this country was 1·7 bushels more than that recorded for Scotland. It is probable, again, that there is no soil in the United Kingdom more suitable for growing good barley crops than certain districts of the County Wexford, the Cloyne district of County Cork, and portions of Lower Ormond, in North Tipperary.

In regard to green crops, while Ireland holds her own in the case of turnip production per acre, the estimate of the yield of the potato crop in this country is remarkably lower than that of England. It must be remembered, however, that the area under potatoes in Ireland is on an average between two and three hundred thousand acres more than the area under the same crop in England.

Estimated Yield per Acre (Tons) of Potatoes and Turnips.

The late Dr. Coyne in his Reports on the Agricultural Statistics of Ireland for the years 1900 and 1902 dealt very fully with the matter of the size of holdings and the number in each group of holdings as classified for these annual Reports. He pointed out that an

extensive consolidation of holdings and a considerable increase in the number of the larger-sized farms had, in the past half century or so, accompanied the gradual substitution of pasture for tillage and the continuous emigration of the rural population; a comparison was made between the economic conditions prevailing in certain of the smaller continental countries and those obtaining in Ireland, and Dr. Coyne expressed his opinion that "a wide extension of labourers' homes and allotments and the spread of rural industries subsidiary to agriculture are necessary developments of the self-help and State-aided movements which are now at work in Ireland." In view of the ample treatment of the subject then given it is now only necessary to repeat one or two of the statistical statements, having the figures for 1903 substituted for those of 1902. In the following table the estimated relative proportions of the area of land comprised in each group of holdings are, probably, approximately

Holdings
and
Occupiers.

accurate. It is assumed that the arithmetical mean of the extremes in each group of holdings is the true average of the group. In a separate column the maximum area possible under each class of holding is shown, though it must be remembered that while the figures in this column may possibly be true for any given group (an extremely unlikely result, it need not be said) they cannot, of course, be true for all:—

TABLE OF OCCUPIERS AND HOLDINGS IN IRELAND IN 1903.

Size of Holdings.	Number.		Estimated Total Area of each class of Holdings.	Maximum Possible Total Area for each class of Holdings.	Percentage of Total Number.		Percentage of Estimated Total Area.	Assumed Average Size of Holdings in Acres.

When analysing a table of this kind it must be borne in mind that in any attempt to estimate the size of an agricultural holding in a given country which may be considered as the minimum economic unit necessary for and capable of the support of a household, surrounding conditions must be most carefully studied. Such factors as the character of the soil, the density and industrial character of the population, the conditions of general and technical education, the existence of subsidiary industries, the proximity to good markets, the transit facilities and freights available, the degree of organisation of the agricultural community in regard to matters like the joint purchase of seeds and manures and the joint sale of products like butter, and the stage of development of agricultural credit, to mention no others, exercise a decisive influence on the determination of the size of the holding which can, in any given set of circumstances, be worked profitably with the labour of a single family.

* The figures in these classes show larger numbers of occupiers than holdings, but this is explained by the amalgamation of areas—for instance, two holdings of 150 and 175 acres held by one occupier appear separately in their respective classes of holdings, but when the acreage is added together in the process of finding the number of occupiers, they are entered as in the possession of one occupier of the higher class, viz.:—that of "above 200 and not exceeding 500 acres."

The class of holdings "not exceeding 1 acre" include not merely labourers' allotments, but also town plots and gardens, and hence their relatively high proportion in the least rural provinces and counties. Taking 100 to represent the total of this category of holding for Ireland, Leinster claims 34·6, Munster 31·0, Ulster 25·7, and Connaught 8·7. Nor does the relative position of the provinces or counties change when (as is done in table B.) we eliminate the disturbing element of the varying sizes of the provinces and counties by expressing the number of holdings of each class in each province or county in percentages of the total number of all classes of holdings in that province or county. It will be noted that the estimated area covered by the class of holdings in question—0·2 per cent. of the entire area of Ireland—is insignificant. In the second group of holdings, those "above 1 acre and not exceeding 5 acres," we must still be dealing largely with occupiers who, except in certain favoured districts, where market-gardening is profitable, must be agricultural labourers or farmers with subsidiary sources of income, such as fishing. The holdings between 5 and 30 acres are, so far as the number of occupiers are concerned, the most important category. No fewer than 259,105 occupiers, or 47·6 per cent. of the total occupiers of Ireland, occupy farms above 5 acres and under 30 acres. It is somewhat surprising to find that these quarter of a million occupiers are (on the estimate assumed in the table on p. xv.) settled on only 22·4 per cent. of the estimated total area. In fact, it would appear that—omitting the first class of holdings as not properly agricultural—over 310,000 occupiers of the land of Ireland farm considerably less than a quarter of the estimated total area of the country. This result is still more disquieting when we advert to the fact that the majority of the land in the possession of these small farmers is second-rate, or inferior, land, and not, as is generally the case in such countries as Belgium, the best soil. The holdings between 30 and 200 acres, when both the number of occupiers and the area of land under them are considered, are far and away the most important in the country, and, no doubt, form the backbone, so to speak, of Irish agriculture. The number of occupiers of such holdings is 144,768 while they cover 52·8 per cent. of the estimated total area of the country. The aggregate area of farms above 200 acres seems to be in or about 24·0 per cent. of the estimated total area.

According to the returns for 1903, the number of separate holdings was 590,648, being 239 more than in the previous year. The holdings which decreased in number were those "above 1 and not exceeding 5 acres" by 572; those "above 50 and not exceeding 100 acres" by 122; those "above 200 and not exceeding 500 acres" by 6; and those "above 500 acres" by 5. The holdings which increased in number were those "not

exceeding 1 acre" by 283; those "above 5 acre and not exceeding 15 acres" by 194; those "above 15 and not exceeding 30 acres" by 324; those "above 30 and not exceeding 50 acres" by 126; and those "above 100 and not exceeding 200 acres" by 17.

Size of Holdings.	Number in 1902.	Number in 1903.	Increase or Decrease in 1903.	
			Increase.	Decrease.

Above 500 Acres, ...	1,521	1,616	—	5
Total, ...	590,609	590,613	230	—

As in many instances landholders occupy more than one farm, and as in other cases farms extend into two or more townlands—the portion in each townland being enumerated and classified as a separate holding—it has been considered desirable, with the view of ascertaining the number of Occupiers, and of classifying them according to the total extent of land held by each, to obtain a return of the number of persons having more than one farm or holding. Each enumerator is, therefore, required to furnish the name of every landholder residing in his district who has two or more farms, or whose farm extends into two or more townlands, together with the area of each portion and the locality in which it is situated. From the number of actual occupiers thus arrived at, it appears that in 1903 there were 590,648 holdings in the hands of 544,625 occupiers.

The number of separate holdings and the number of occupiers in each province in 1902 and 1903, respectively, were:—

PROVINCES.	Number of Separate Holdings.		Number of Occupiers.	
	1902.	1903.	1902.	1903.
Leinster, ...	129,913	130,009	116,900	116,902
Munster, ...	126,053	126,618	123,118	124,070
Ulster, ...	201,214	201,094	187,374	187,991
Connemara, ...	123,214	122,907	115,667	115,602
Total, ...	580,400	580,648	543,069	544,625

The total number of occupiers of land returned in 1903 was 544,625, being 976 more than in the previous year. Excluding

those holding land "not exceeding one acre," who are to a great extent merely occupiers of small gardens, the landholders numbered 470,699 in 1903, or 402 more than in 1902, the number in Leinster having decreased by 393—from 91,765 in 1902 to 91,372 in 1903; but increased in Munster by 126—from 100,926 in 1902 to 101,052 in 1903; in Ulster by 128—from 168,823 in 1902 to 168,951 in 1903; and in Connaught by 541—from 108,783 in 1902 to 109,324 in 1903. There was an increase of 713 occupiers holding land above 1 and not exceeding 50 acres, and the number holding land exceeding the latter acreage decreased by 311.

The following statement shows the number of occupiers of land in each year from 1896 to 1903 by provinces:—

PROVINCES.	Number of Occupiers in the Year.							
	1896.	1897.	1898.	1899.	1900.	1901.	1902.	1903.
Leinster, . .	111,853	112,722	113,687	117,634	116,104	116,721	113,900	112,562
Munster, . .	117,179	117,135	117,974	121,694	122,780	123,436	123,118	124,570
Ulster, . .	183,337	187,963	187,337	183,743	190,660	187,904	187,874	187,331
Connaught, . .	115,680	115,651	115,360	116,137	116,116	115,177	115,687	115,032
IRELAND, . .	533,043	533,514	533,358	544,164	544,660	543,238	541,525	544,025

The number of holdings "above 1 and not exceeding 5 acres" diminished enormously between 1841 and 1903. In Leinster the decrease was 64·8 per cent.; in Munster 79·2; in Ulster 80·2; in Connaught 87·6; and in all Ireland 79·9 per cent. In the same period holdings "above 5 and not exceeding 15 acres" diminished; the decrease in all Ireland was 38·8 per cent. In Leinster the decrease was 45·1 per cent.; in Munster 68·5; and in Ulster 36·3; while in Connaught, on the other hand, these holdings increased 2·4 per cent. Holdings "above 15 and not exceeding 30 acres" increased 5·7 per cent. in Leinster; 112·8 per cent. in Ulster; and 490·0 per cent. in Connaught; they decreased 11·6 per cent. in Munster. In all Ireland they increased 69·3 per cent. Holdings "above 30 acres" increased 119·4 per cent. in Leinster; 244·9 in Munster; 361·4 in Ulster; 430·2 in Connaught; and 238·4 per cent. in all Ireland. The total number of holdings "above 1 acre" decreased between 1841 and 1903 by 22·7 per cent. in Leinster; 30·8 per cent. in Munster; 23·2 in Ulster; and 25·3 in Connaught; and 25·4 in all Ireland.

The figures relating to the Live Stock in Ireland in June, 1903, show that the Irish herds of cattle had decreased by 118,109 heads when compared with those of 1902, the numbers respectively for 1902 and 1903 being 4,782,221 and 4,664,112. This was a check to the annual increase which had gone on progressively

from 1895 to 1902, when the highest total ever recorded for Irish cattle was reached. The number for 1903, however, was 149,558 greater than the average annual number for the ten years 1893-1902.

There was an increase in the number of Pigs from 1,327,610 in 1902 to 1,383,516 in 1903. At the period of the enumeration in 1903 the total number of horses in Ireland was 595,746, being an increase of 15,981 compared with the number for 1902. There was an increase of 7,768 in the number "two years old and upwards," an increase of 7,430 in the "one year old and under two," and of 783 in those "under one year." The number of Mules was 29,795, or 398 more than in 1902, and the number of Assees 243,241, being an increase of 379. Horses, Mules and Assees taken together numbered 852,024 in 1902, and 868,782 in 1903, being an increase of 16,758, or 2.0 per cent., in the latter year; compared with the average number for the ten years 1893-1902, they show an increase of 8,039, or 0.9 per cent.

The number of Sheep in 1903 was 3,944,604, being 271,261 less than the number for the previous year, and 286,621, or 6.8 per cent., less than the average for the ten years 1893-1902; the "one year old and upwards" decreased 193,429, as compared with the number in 1902, and those "under one year" decreased by 77,832, or 4.5 per cent. Pigs were returned as 1,383,516 in 1903, showing an increase of 55,906, or 4.2 per cent., as compared with the previous year. The "one year old and upwards" increased by 9,671, or 5.5 per cent., and those "under one year" increased by 46,235, or 4.0 per cent. Comparing the number of pigs returned in 1903 with the average for the ten years 1893-1902, we find an increase of 79,043, or 6.1 per cent. The number of goats in 1903 was 299,120, being 4,534 less than in 1902, and 8,332, or 2.7 per cent., under the average for the ten years 1893-1902. Poultry numbered 18,153,714 in 1903, being 350,610 less than in 1902, but 579,144, or 3.3 per cent. over the average for the ten years 1893-1902. Of the 18,153,714 poultry in 1903, 959,787 were turkeys; 1,768,613 geese; 2,895,841 ducks; and 12,529,478 ordinary fowl. Compared with 1902, turkeys decreased by 73,705, geese by 67,578, ducks by 49,880, and ordinary fowl by 154,447.

The summary table S. (page 20) shows the number of Milch Cows in Ireland in each year from 1854—the first year in which Milch Cows were separately enumerated—to 1903. The average number for the first five years of the period was 1,579,851, and for the last five years 1,478,066, being a decline of 101,785, or 6.4 per cent. The highest number in any one year was 1,690,389 in 1859, and the lowest 1,348,886 in 1864. The number for 1903 was 1,495,179, being 29,911 over the average for the preceding five years, but 15,558 under the number for 1902; with the exception of the year 1902, the number of Milch Cows enumerated for 1903 was, however, higher than that for any year since 1877.

A more accurate idea of the number of live stock produced in Ireland is furnished when we take into account the export trade, the extent of which is shown in the subjoined statement :—

Exports of Live Stock from Ireland to Great Britain.

Average of 3 Years.	Cattle.	Sheep.	Pigs.
1854, 5, and 6, ...	242,290	682,230	241,293
1861, 5, and 6, ...	331,417	307,435	408,740
1874, 5, and 6, ...	631,962	781,007	440,423
1884, 5, and 6, ...	691,234	682,196	425,560
1894, 5, and 6, ...	766,707	782,328	550,925
1897, 8, and 9, ...	773,892	836,612	637,548
1900, 1, and 2, ...	782,466	920,463	640,768
Year 1902, ...	932,241	1,655,302	637,372
Year 1903, ...	937,646	825,679	569,920

The growth in the export trade between 1855 and 1875 is remarkable, as is also the expansion in the export trade of sheep and pigs in recent years; a further point to be observed from the figures in the above table is the considerable drop in the exports last year under each of the three heads following on the large increase of exports of cattle and sheep registered for 1902. Another aspect of the extent of the trade is presented in the table that follows :—

TABLE showing the Percentage of Cattle, Sheep and Swine exported from Ireland to Great Britain to the Total Cattle, Sheep, and Swine enumerated as in Ireland in each of the Years 1893 to 1903.

YEAR.	Percentage of Cattle, Sheep, and Swine Exported, to Total Cattle, Sheep, and Swine in Ireland.		
	Cattle.	Sheep.	Swine.
1893,	134	251	396
1894,	128	233	421
1895,	132	167	499
1896,	135	181	435
1897,	167	193	324
1898,	179	194	470
1899,	171	200	506
1900,	162	187	574
1901,	136	193	489
1902,	201	250	481
1903,	152	209	413

The increasing degree of foreign and colonial competition with the Irish store and fat cattle export trade to Great Britain is

indicated by the accompanying diagram which shows the value of the foreign and colonial imports into the United Kingdom of all classes of beef and mutton in each of the 10 years 1894-1903.

Of the total area of Ireland only about $1\frac{1}{2}$ per cent. is under woods, while there is over 23 per cent. of uncultivated land in the country. The

Forestry.

The woods in England are 5.1 per cent., in Scotland 4.5, and in Wales 3.8 per cent. of the total areas. Dr. Schlich, in his Report on the Afforestation of Ireland, 1885, estimates that about 2,000,000 acres of the total waste land of this country could be made available for plantations. Professor Fisher, of the Royal Indian Engineering College, endorses this view, and adds:—"Tenants and graziers who would oppose the planting of 2,000,000 acres of the waste lands of Ireland, must be extremely short-sighted people; the greatest of all wants in Ireland is an investment of capital of this kind, an investment which will yield an enormous return in affording labour to the people, and in supplying raw material for industries which cannot prosper without it, as well as timber for export, and for the improvement of farms and dwellings."* There is annually imported into the United Kingdom from Sweden, Norway, Russia, and other countries timber valued at over nine millions sterling, of a kind that could be grown in these islands, that is eliminating such exotic woods as teak, mahogany, and the hard woods of Australia. In view of these considerations, it is unsatisfactory to find that there has been a net decline of 35,806 acres since 1880.

Inquiries relative to woods and plantations, showing the extent in acres of each class of timber, were made in connection with the Census of 1841. The following is a summary of the acreage under each kind of tree (exclusive of detached trees) in that year, distinguishing the periods in which the trees were planted:—

Period in which Planted.	Oak.	Ash.	Elm.	Beech.	Fir.	Mixed.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Previous to 1794,	22,784	2,677	437	938	1,612	76,687	103,095
1794-1804, ...	1,633	967	135	384	1,943	22,399	25,561
1804-1814, ...	1,327	689	124	542	2,691	21,937	30,270
1814-1824, ...	1,333	679	121	279	5,496	61,578	64,356
1824-1834, ...	1,343	442	140	130	7,654	61,456	61,794
1834-1840, ...	1,197	628	220	600	6,515	65,389	65,007
TOTAL, ...	29,533	6,642	1,417	3,274	25,239	290,596	345,604

* See *Lecture on Forestry*, given before the Royal Dublin Society, March 3, 1899.

Since 1851 (with the exception of the year 1852) the acreage under woods and plantations has been ascertained annually in connection with the Agricultural Statistics; but until the year 1891 the total extent was the only information sought for, no particulars as to the kind of trees having been obtained. In that year returns giving the latter information were collected and the results were published in a table showing by counties the distribution of the various descriptions of trees.

The following table shows the acreage under woods and plantations in the year 1851, and in each year from 1853 to 1903, inclusive:—

ACREAGE UNDER WOODS AND PLANTATIONS.

Year.	Statute Acres.	Year.	Statute Acres.	Year.	Statute Acres.
1851	304,906	1869	320,461	1887	329,383
1852	No Return	1870	320,353	1888	331,687
1853	305,221	1871	320,980	1889	330,363
1854	308,323	1872	325,703	1890	327,461
1855	300,476	1873	323,056	1891	321,554
1856	300,986	1874	322,328	1892	306,586
1857	312,817	1875	318,695	1893	307,356
1858	313,271	1876	324,182	1894	309,276
1859	318,574	1877	329,536	1895	308,928
1860	315,324	1878	328,687	1896	307,407
1861	316,097	1879	326,846	1897	307,441
1862	317,345	1880	329,858	1898	307,661
1863	317,124	1881	323,708	1899	308,406
1864	318,963	1882	323,999	1900	311,548
1865	329,123	1883	331,245	1901	309,741
1866	327,890	1884	332,000	1902	303,023
1867	328,420	1885	329,417	1903	304,052
1868	322,928	1886	326,022		

The above statement shows that, during the period 1851-1903 the number of acres under woods and plantations varied from 339,858 in 1880 to 303,023 in 1902, and that, comparing 1903 with 1851, there has been a decrease of 0·3 per cent., the extent in 1851 being 304,906 statute acres, and in 1903, 304,052 acres; the lowest for any year (except 1902) during the periods covered by the table.

In addition to the information regarding the total area under woods and plantations, returns were obtained in 1903 showing the proportion of the area entered under this heading occupied by each of the various kinds of trees. According to these returns, 46,953 acres of the total area (304,052 statute acres) under Woods and Plantations were under Larch, 32,175 under Fir, 15,465 under Spruce, 2,852 under Pine, 24,867 under Oak, 7,470 under Ash, 9,776 under Beech, 2,731 under Sycamore, 3,051 under Elm, 3,569 under Other Trees, and

155,143 were returned as under Mixed Trees. The area under Woods and Plantations in Leinster was 93,844 acres; in Munster, 102,882 acres; in Ulster, 56,493 acres; and in Connaught, 50,833 acres.

The inquiries into forestry operations instituted in 1890 and continued in the ten following years, were repeated in 1903. During the year ended 30th June, 1903, 1,096 acres were planted with trees, 161 acres more than the extent planted in the preceding year. In connection with this subject, it may be here mentioned that from the passing of the Act 29 and 30 Vic., cap. 40, to the 31st March, 1903, 139 loans, for £32,410, were sanctioned for planting for shelter. Two loans were sanctioned in the last year of that period. The number of trees felled, both for clearance and for thinning plantations, amounted to 1,449,583. The area returned as cleared is 2,872 acres. It will be noticed that while, according to the Table on the opposite page, there would appear to have been an increase of 1,029 acres under woods and plantations, from these forestry statistics there would appear to have been a decrease of 1,776 acres under woods. There is thus a discrepancy in the figures, but there are very considerable difficulties in ascertaining the area under woods and plantations from a very large number of persons, many of whom are imperfectly acquainted with the acreage under timber on their holdings. Of the trees felled, 356,070 were used for "propping," which appears to have been the chief purpose to which the timber of almost all descriptions was applied. The numbers applied to the principal specified uses comprise also:—19,505 trees for sleepers, 25,976 for paling, 55,780 for fuel, 4,231 for furniture and building purposes, 5,951 for carts, wagons, &c., and 8,100 for ship-building.

When collecting the forestry statistics last year, the enumerators endeavoured to obtain information of the number of trees blown down by the fierce storms in February, 1903. The particulars thus obtained have been summarised, and will be found in table 25, pp. 128-129. While it is not pretended that the figures accurately, or, possibly, even approximately, represent the damage to the forestry of the country, yet they may be taken as fairly indicating the distribution of the effects of the storms referred to.

The inquiries made in the preceding sixteen years relative to the extent to which bee-keeping is followed

Bee-keeping.

in Ireland were repeated in 1903, and according to the returns received, there would appear to have been a decrease of 27.0 per cent. in the quantity of honey produced in 1902 as compared with the preceding year, the returns for which showed an increase of 15.2 per cent. as compared with the quantity in 1900. The quantity of honey produced, according to the returns, was

524,166 lbs.; of this, 136,561 lbs. were produced in the province of Leinster; 169,641 lbs. in Munster; 125,878 lbs. in Ulster; and 92,086 lbs. in Connaught. Of the 524,166 lbs., 347,818 lbs. were produced "in Hives having Movable Combs," and 176,348 lbs. "in other Hives." It was stated that 212,614 lbs. was "Run Honey," and 311,552 lbs. "Section Honey." The number of stocks brought through the winter of 1902-1903 amounted to 32,770; of which 17,657 were in hives having movable combs, and 15,113 in other hives. According to the returns collected, there were 5,890 lbs. of wax manufactured in 1902, of which 3,749 were from hives having movable combs, and 2,141 lbs. from other hives. The returns received in 1902 gave the number of swarms at work during the season of 1901 as 28,538; the quantity of honey as 718,218 lbs.; the number of stocks brought through the winter of 1901-1902 as 34,798; and the quantity of wax manufactured in 1901 as 5,926 lbs.

I have the honour to be, Sir,

Your obedient servant,

THOMAS BUTLER,

Statistics and Intelligence Branch.

The Quantity of Live Stock in 1903, by Unions,	12	89
The Quantity of Live Stock in each year from 1894 to 1903, by Counties and Provinces,	13	99
Number of Entire Horses,	14	114
Number of Bulls,	15	116
Number of Boars kept for Breeding Purposes	16	118

STOCK-
HOLDERS.

DETAILED TABLES

Number of Stockholders in 1903, by Counties and Provinces,	11	86
Number of Stockholders in 1903, by Unions,	12	89

ANNUAL RETURNS OF EXTENT AND YIELD OF POTATO CROP—DAIRY INDUSTRY—
BEE-KEEPING.

	DETAILED TABLES.	Table	Page
POTATOES.	Total Area under Potatoes and Extent in Statute Acres under each description of that Crop planted in 1903, by Counties and Provinces,	17	120
	Total Area under Potatoes and Extent in Statute Acres under each description of that Crop planted in 1903, by Unions,	18	122
	The Average Rate of Produce per Acre of each description of Potato planted in Ireland in 1903, by Counties,	19	128
DAIRY INDUSTRY.	DETAILED TABLE.		
	Showing the Number of Dairy Factories and Condensed Milk Factories in 1903, with Number of Milk Separators in Use, the Number of hands permanently employed, the Quantity of Butter, Cream, &c., produced, and other details,	20	130
BEE-KEEPING.	SUMMARY TABLE.		
	Showing the Honey produced in each of the eleven years, 1892-1902,	W	21
	DETAILED TABLE.		
	Table showing, by Counties and Provinces, the Number of STOCKS in the middle of May, 1902; the Number of SWARMS during 1902; the Number of STOCKS at the beginning of Winter, 1902, and the Number brought through Winter, 1902-1903; with the Quantity of HONEY produced and WAX manufactured in 1902,	21	132

ANNUAL RETURNS OF SCUTCHING AND CORN MILLS, FORESTRY, AND WAGES OF AGRICULTURAL LABOURERS.

	DETAILED TABLES.	Table	Page
SCUTCH- ING AND CORN MILLS.	Number of Scutching Mills in 1903, classified according to the Number of Stocks in each Mill, and the Power used in Working them, with the Total Number of Stocks in each County,	22	134
	Number of Corn Mills in 1903, by Counties and Provinces, classified according to the Power used, the kind of Corn chiefly ground, &c.,	23	135
FORESTRY.	DETAILED TABLES.		
	Table showing, by Counties and Provinces, the Area PLANTED with Trees during the year ended 30th June, 1903, and the Number of each description of Tree planted,	24	136
	Table showing, by Counties and Provinces, the Area CLEARED during the year ended 30th June, 1903, and the Number of each description of Tree FELLED,	25	138
	Table showing the AGES of the Trees of each Description FELLED in Ireland in the year ended 30th June, 1903, and the USES to which the Timber was applied,	26	140
	Table showing the USES to which the Trees FELLED in each County during the year ended 30th June, 1903, were applied,	27	146
WAGES OF LABOURERS.	DETAILED TABLE.		
	Showing the Wages of Agricultural Labourers in Ireland by Constabulary Districts,	28	148

(a) In harvest time, both men and women for a short period earn 3s. a day each binding corn. As a rule women and girls are not generally employed as daily agricultural labourers.

(b) For about six weeks of harvest men get £1 per week, and women and boys 18s. per week. In some cases farmers give a bonus of £1 to their labourers.

(c) Without meals.

(d) Without food.

AGRICULTURAL LABOURERS IN 1903.

(a) Without food. Labourers are generally hired by the half-year.

(b) The rates vary very much in different parts of the district, apparently according to the demand in the particular locality. Women and girls are very little employed.

(c) Food is supplied in every case. Men mowing in the Summer get double the average wages. Very little female labour given, and that only in Summer.

(a) Men are not dieted. Boys, women, and girls receive diet.

(b) Without food.

(c) Where board and lodgings are provided the average rate of wages for men is about 1s. per day less than that shown: for boys and women about 9d. less, and for girls about 6d.

(d) The higher rate is given without food.

(e) The rates shown are without board.

(f) Without food.

(g) With dinner and tea.

(h) There are no girls employed in winter as agricultural labourers.

(a) No girls employed in winter, and only a few in summer.

(b) There are not, properly speaking, any agricultural labourers in this district; but for the few days labourers are employed they get the above wages.

(c) Very few women or girls employed in this district.

(d) In the harvest time, saving hay and oats, the wages average a third more than those shown.

(e) Women, or girls not employed.

(f) Very few agricultural labourers employed in this district, as it is principally a fishing district.
